

If you have no time to manage more jobs or don't use your Upwork account, then please give me some partial access to your Upwork account.

I have full-time availability and tons of experience in Upwork so I can make money in very efficient way. As a cost, you will get 10% of the withdraw payment.

To avoid scam activities, I suggest partial access right to the Upwork account. the Upwork has two kinds of Passwords

- One is the Upwork account password, that you can see when you try to login the Upwork homepage
- the another is a security question & password, that you see when you access to settings page.

You will manage the Upwork account password so that I could not steal your account.

And I will manage the settings page password so that you could not withdraw money without me.

Also, I hope you allow me to work on your computer remotely. Since the Upwork doesn't allow you to use your account in different places, nor use any VPN or VPS, I can't use your account on my local. In that case, they will block your account.

So I hope to work on your pc via the "Anydesk" app or the "Teamviewer" app (<https://anydesk.com>, <https://teamviewer.com>).

If you don't like for me to access your computer, then we can install Virtual Box on your pc, and I can work on the Virtual box. (Virtual box provides a virtual system, so if I work on the Virtual box, my work won't bother you and your data is safe and secure)

Your duty in this project

- Open the Upwork.com tab on your web browser and open the Teamviewer app on your computer
- You will connect your bank card or PayPal to your the Upwork account
- Withdraw payment from the Upwork to your paypal or bank and send me 90% of it. And you will take the rest 10%.
- Should have a Video call and ID verification with the Upwork after getting a first job

My duty in this project

- Access to your computer and bid the Upwork jobs, messaging with clients, Technical interviews.
- Do all development (I will not use your computer for development. It will be done on my computer) and send good result to clients, get paid to your account.

I am sure I can get 4 jobs and will get 100% job success score in a month with your current account.

All development will be done by me on my computer and once we get paid from upwork, you will get 10% of it.
