Blockchain Smart Contract

Angular

React.js

Next.js

Vue.js/Vuex/ Vuetify

CSS3/SASS/Bootstrap

Node

PHP

Python

MySQL

MongoDB

PostgreSQL

REST API

GraphQL

Docker

## Languages

Russian

English

## Hobbies

Travel, Swimming, Basketball

## Profile

It's easy to find people promising everything and delivering almost nothing.

My major strengths are in giving realistic promises, being responsive and responsible, concentrating on business needs and communications. So I am not a pure geek thinking about technology only but, first, a making-things-happen person.

## QUALIFICATIONS SUMMARY

1. Having Good experience in Legacy Applications, In-House Applications, Re-engineered Applications, Web Applications, End-End Applications and Migration Projects.
2. Involved in all phases of SDLC, Product Grooming Meeting, Product Backlog meeting, JAD, Requirements gathering, Good communications skills with BA, PM and Senior Developers.
3. Followed best approaches, Technics for Code refactoring and Code enhancements for delivering Quality code to end clients.
4. 9 years of Professional experience in frontend technologies, libraries and frameworks.
5. Taken Initiative to deliver complex modules in absences of Team lead and BA.
6. Provided User stories and Estimates for the tasks based on UX Mock up and Screen shots. Demonstrated ability to complete high-end projects in deadline-oriented environments.
7. Hands on Experience with React 15 and Latest 16,17 versions, Redux, React Hooks, React native, Angular JS, Angular2/4/5/6/7/8/9, Context Api, GraphQL, SQL, ES6+, Unit Testing, Node, Java, Python, React Hooks, CI-CD, Devops, Jenkins, Dockers, AWS.

## Employment History

### Full-Stack Web Developer | Waveguide LLC

February 2008 - January 2012

Developed a test automation and report generation application for an information system used in local community service centers.

### Senior Full-Stack Web Developer | Wagona Group Ltd

May 2015 - January 2016

Modeled the future database for iOS CycleMap application. Wrote scripts that automated the decisions to add bike lanes to the application. Created multiple web tools to use and modify the data in the database. I've developed many full-stack projects in this company by using technologies: jQuery, PostgreSQL, Node.js

### Senior Full-Stack Web Engineer | VolKno

JULY 2017 - APRIL 2018

Created a microservices back-end in MERN Stack. Developed an React.js front-end app. Worked with the project manager to define the software requirements. Set up the AWS+DO deployment process.

### Full-Stack Web Engineer | Scoutible

AUGUST 2018 - JUNE 2019

Led the development of a native mobile trading application for Web application and Android. Developed a React/Redux back-office and client portal application. Implemented Asterisk integration with the back-office. Dockerized the application and deployed it to AWS. Performed code review and coached

team members, providing DevOps support. Implemented custom high-performance APIs for MT4 trading platform. Developed a Node.js/Express/GraphQL-based high-load back end.

## Education

### Belgrade University

Bachelor's degree, Computer science

2012-2016
